Mr. Geo. M. Bacon, State Engineer
State Capitol Bldg.
Salt Lake City, Utah

Dear Sir:

We acknowledge your letter of recent date in which you call attention to our delinquency of the Commissioner's Assessment for the distribution of the water on the Sand Wash Creek. We regret that this matter has been delayed, but the assessment was much more than was expected and there is a feeling had by some of the company officials that the benefit derived from the Sand Wash water is not really worth very much more than the assessment amounts to.

A year ago last Spring when E. H. Burgess, President of this Company, and myself were at your office in connection with proof, we authorized your office to cancel ten cfs from the application # 6960 which left fifteen cfs as the appropriation. I am inclined to believe that in making the assessment, this charge was overlooked.

I was instructed at our last Directors Meeting to again reduce this filing. Will you please inform us just what steps are necessary to make the proper record in your office of any change we may wish to make in the way of reducing the filing.

Enclosed you will find our warrant in the sum of \$100.00 covering the assessment.

Yours very truly,

Louis Galloway
Secretary.
